

simalube – the single-point automatic lubricator for reliable use in the paper and cardboard industry.

Proper maintenance reduces maintenance costs, even in the paper and cardboard industry.

The maintenance and the proper delivery of lubrication economy is relevant in many areas of a paper or cardboard factory.

Machinery and equipment in paper and cardboard factories must function in harsh conditions. Moisture, heat, steam and dust are created by the machinery as it runs. A reliable supply of lubrication to the lubrication points is essential. Without regular maintenance, parts wear out or corrode prematurely; this can severely impair the function of the machine and lead to a high failure rate as well as repair costs and maintenance work.

The use of single-point lubricator **simalube**[®] can substantially reduce maintenance costs and increase the life of a factory.

simalube reduces maintenance costs!

Typical applications in the paper and cardboard industry:

- Treatment processes (pumps, cylinders, filters, vacuum cleaners, calendar rolls)
- Processing (pulp, Turbo separator)
- Conveyors
- Shredders (reject)
- finishing processes (roll up, cut, packaging/compacting, labelling, pelletization)

The use of **simalube**® lubricant lubricators reduces maintenance costs in paper and cardboard factories significantly. The lubricator reliably provides the appropriate amount of lubrication under extreme external conditions with the required amount of lubricant. The self-contained system also guarantees that no dirt particles get into the lubrication point or the lubricant. This extends the life of the machines and its components.

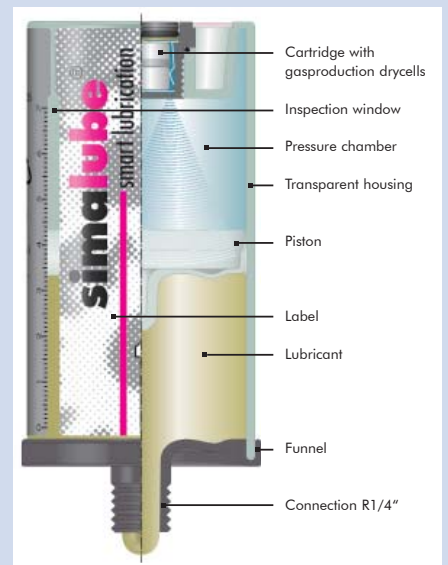

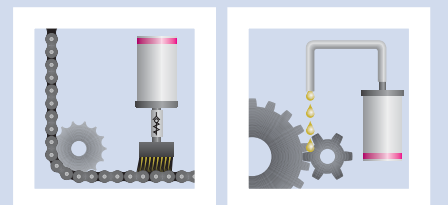

Take advantage of the automatic **simalube**® lubricator:

- Proven lubrication system in the paper and cardboard industry
- Reduced maintenance costs
- Increased reliability
- Longer life of the machinery
- No stopping the machine during maintenance required
- Easy installation
- No more manual lubrication necessary
- Environmentally friendly disposal options i.e. recycling

Further practical benefits of the **simalube**® lubricator:

- Reliability - allowing fit and forget procedures until predetermined replacement time.
- Flexible time setting from 1 to 12 months reduces inventory costs as one lubricator covers a wide range of time settings
- Easy adjustment of dispensing rate during operation
- Can be temporarily deactivated
- Refillable
- Available in four sizes: 30, 60, 125 and 250 ml
- Transparent container to check lubricant levels
- Ideal relation between size and content of lubricant. Compact size permits installation in restricted areas
- Hermetic sealing prevents ingress of dirt or foreign matter
- No harmful chemicals to generate the drive gas
- Intrinsically safe, various safety approvals, Ex, GS, and FM
- Wide range of accessories is available such as adapter nipples, tubes and brushes
